SUMMARY

Computer Science and Engineering graduate with a strong foundation in full-stack development, computer vision, and mobile application development. Proficient in Python (Django), ReactNative, Node.js, PostgreSQL, OpenCV, and web technologies (HTML, CSS, JavaScript), with hands-on experience building innovative, real-world projects. A proactive problem-solver passionate about leveraging emerging technologies to deliver efficient and impactful solutions. Seeking an entry-level opportunity to contribute meaningfully to a forward-thinking organization while growing as a software professional.

EDUCATION

Annai Vailankanni College Of Engineering, Kanyakumari	2022-2026
Department of Computer Science and Engineering (B.E)	(CGPA-7.8)
Govt Hr. Sec. School, Pallakkal Pothukudi, Tirunelveli	2021 - 2022
HSC	(66%)

TECHNICAL SKILLS

- Programming Languages: Python
- Web Technologies : HTML, CSS, JavaScript, Django, Bootstrap, node js, SQL(Postgresql).
- Tools & Platforms: VS CODE, Git&GitHub, Figma ,Canva.
- ReactNative, Open CV(Basics)

INTERNSHIPS

- 1.Completed an Internship in IPCS Global focused on Python Framework(Django).
- 2.Completed an Internship in Wizbees Technologies on Full Stack Developer Trainee.

PROJECTS

1. Responsive Business Website Using HTML, CSS, and JavaScript

Developed a fully responsive and interactive company website for PayanTech, a software solutions and IT services brand. Designed and coded the entire front-end using HTML5, CSS3, and JavaScript, ensuring smooth navigation and scroll-based animations. Implemented a modern, professional UI/UX layout to represent a technology company's identity. Optimized for mobile and desktop, with fast load times and clean, semantic code structure. Hosted the website on GitHub Pages for public access and version control.

Live: <https://tamizhselvan-001.github.io/Payantech/>

2. IOT-Based Smart Water Level Monitoring System

Developed a smart water level monitoring system using IoT sensors to measure and track real-time water levels in tanks or reservoirs. Integrated ultrasonic/float sensors with a microcontroller (Arduino/ESP8266) to continuously collect water level data and transmit it wirelessly. Built a Mobile Application to visualize live water level stats, historical trends, and threshold-based alerts for overflow or low-water conditions. Implemented an automated alert notification system via email to notify users when water levels cross critical thresholds, reducing manual monitoring efforts. The system improved water management efficiency, minimized wastage, and demonstrated practical application of IoT in smart resource monitoring.

CERTIFICATIONS

- UiPath Automation Implementation Methodology Fundamentals – Certificate of Completion.
- Naan Mudhalvan Robotic Process Automation Foundation Course for Engineering Students – Diploma of Completion.
- Microsoft Office Essentials – Certificate of Achievement-Naan Mudhalvan Program, Tamil Nadu Skill Development Corporation (TNSDC) in collaboration with Microsoft.
- OpenCV – Certificate of Achievement-Naan Mudhalvan Program, Tamil Nadu Skill Development Corporation (TNSDC) in collaboration with GUVI.
- For the successful completion of Experience Based Project Learning sponsored by Naan Mudhalvan Program, Tamilnadu Skill Development Corporation and conducted by IBM. During the course, the learner demonstrated initiative and commitment to advance in their career.
- ServiceNow Administrator Naan Mudhalvan Scheme — Tamilnadu Skill Development Corporation Issued by: ServiceNow | Salesforce | Smartbridge | Conducted under Government of Tamil Nadu.

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
